**Net Profits**

While the definition of "net profit" in the Local Tax Enabling Act includes net income from the operation of a business, profession or other activity, it does not include income from corporations.

Most distributions passed through a taxpayer by an S Corporation are considered investment income and not subject to the earned income tax, unless the distributions are based on services provided by the taxpayer.

For taxpayers engaged in the business, profession or activity of farming, the term shall not include: Any interest earnings generated from any monetary accounts or investment instruments of the farming business; Any gain on the sale of farm machinery; Any gain on the sale of livestock held twelve months or more for draft, breeding or dairy purposes; Any gain on the sale of other capital assets of the farm.

Net profits do not include income that is "not paid for services provided" or that is in the nature of earning from an investment (passive income).

Persons engaging in more than one business activity during the tax year may offset a loss in one activity against the gain of another.
